Core Project																															
Prepare datasets for the textural entailment task	P	A																													
Reimplement manual discrete prompting		A	A	A																											
Reimplement automated discrete prompting				A	A	A	A																								
Reimplement differential prompting					P	A	A	A																							
Backdoor attacks on manual discrete prompting							P	A	A	A																					
Backdoor attacks on automated discrete prompting											P	A	A	A	A																
Backdoor attacks on differential prompting													P	A	A																
Extensions																															
A wider range of few-shot K values												P	A	A																	
Backdoor triggers with different trigger numbers														P	A	A	A														
Backdoor triggers with different insertion positions																P	P	P													
Additional downstream tasks and datasets				A	A	A	A	A	A	A	A	A	A	A	A				A	A	A	A									
Visualise mask token embeddings to interpret ASR														A	A	A	A														
Invisible backdoor triggers																	P	A	A	A											
Dissertation & Code Repository																			A	A	A	A	A	A	A	A	A	A	A	A	A

Deadlines: Michaelmas week 1, Lent week 3, Easter week 2.
